Article Headline

Article Text

Words that describe subject of the article

Security Code(T\*\*\*\*), Industry Code (#B\*\*\*\*), etc. ※

⑤ Synonymous Expansion

Select to search referring to synonymous expansion (search results include words which hold the same meaning or the same content as the keyword(s)).

- ⑥ Thesaurus Expansion  
【シソーラス展開】 Select to search referring to Nikkei Thesaurus (glossary for archive search).
- ⑦ Page【ページ】 Search specifying the page number which the keyword(s) appear. (from – to)
- ⑧ Additional Criteria  
【シソーラス展開】 Function which enables narrowing down search result further by specifying detailed condition as well as usual search condition.

※<http://telecom.nikkei.co.jp/public/guide/manual/a/a03-00.html#a03-07>

### Synonymous Expansion

Example Keyword 「炭酸ガス」 (Carbon dioxide gas)

•Synonymous match ... Capture articles that contain 「炭酸ガス」, 「CO<sub>2</sub>」 or 「二酸化炭素」.

同義語展開  する  しない

•No synonymous match ... Search articles that contain 「炭酸ガス」 only.

同義語展開  する  しない

### Thesaurus Expansion

When シソーラス展開 being selected, if the typed keyword is included in Nikkei Thesaurus, comprehensive search will be conducted by automatically expanding the following concept.

Default setting is “No Thesaurus Expansion”.

Ex) Search by keyword 「雇用」 (Employment)

•No Thesaurus Expansion ... The articles that contain 「雇用」 will be displayed.

シソーラス展開  する  しない

•Thesaurus Expansion ... The articles that contain 「雇用」's hyponym, such as 「求人倍率」

シソーラス展開  する  しない

「雇用」 itself will be displayed.

### Relationship between hypernym and hyponym

## Create command search queries

Search queries that multiply keyword by keyword using **AND**, **OR** and **NOT** are called Boolean Operations.

### Archive Search Patterns (use of AND, OR, NOT) Venn Diagrams

#### ① AND Operation (Narrow Down)

Articles about 「ビール(Beer)」 as well as about 「新製品 (New Products)」

#### ③ NOT Operation (Exclude)

Articles about 「ビール(Beer)」 except articles about 「新製品(New Products)」

#### ② OR Operation (Expand)

All the articles about 「ビール(Beer)」 and 「ワイン(Wine)」

### Use Advanced Search Commands

Searching for articles related to 「ビール」 or 「ワイン」, which relates to 「新製品」.

✗ Wrong command:

Because “**AND**” is stronger than “**OR**”, 「ワイン**AND** 新製品」 has priority over 「ビール **OR** ワイン」. Therefore, search results will be the articles about 「ワイン**AND** 新製品」 or 「ビール」.

Boolean Operators have priority of **NOT>AND>OR**. Use brackets (half-width) to create search queries changing this order of priority on complex search which involves more than 3 keywords.

○ Correct command:

Place priority search in a round brackets (half-width) to change basic priorities.
